

Citadel.

Simplifying the Management of your Assets.

Citadel helps municipalities make informed decisions based on reliable and structured data.

We propose the creation of a Trial User for you to test our Integrated Municipal Management in English, at your working place, using any type of computer, through our online platform.

Would you like a live demonstration on a video conference over the Internet?

Just send an E-Mail to fortunato@inmental.com requesting a Free Trial User Account or a Live Demonstration over a Video Conference.

After the Free Trial phase, you can Subscribe Annually, the Integrated Municipal Management Service in English that will always be available through our online platform.

If you have any questions, we are entirely at your disposal:

Dr. Fortunato Da COSTA

Fortunato@InMental.com

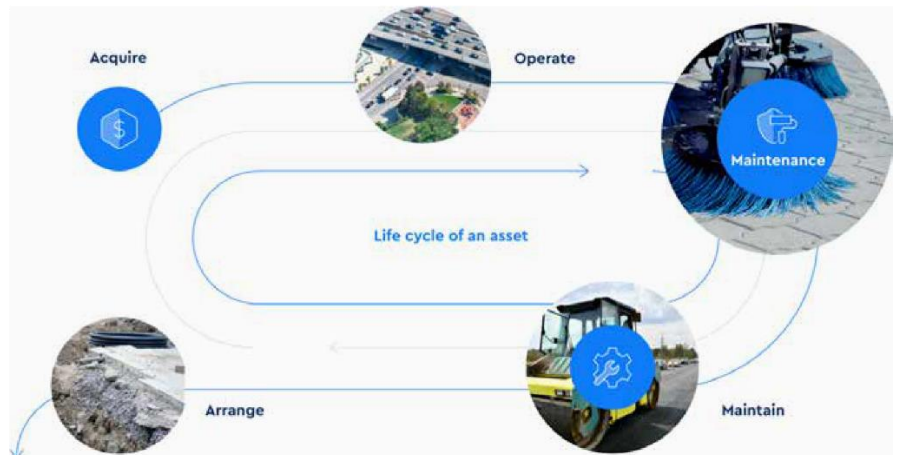

Tel. +(351) 966377939

Leverage your Municipality's Assets.

All of your assets have value, be it financial, social, environmental or cultural. Citadel empowers you with the knowledge and control to make informed investment decisions that will increase that value.

Quebec municipalities have major organizational objectives, such as providing better services to citizens, developing sustainable and safe infrastructure and implementing environmental protection measures. Citadel provides a paradigm shift by allowing them to be more proactive in achieving these objectives while demonstrating sound public financial management.

Get Access to an Efficient CMMS Tool.

A CMMS (Computerized Maintenance Management System) is essential for planning maintenance operations, as it provides an overview of past, current and future operations. It facilitates managing preventive maintenance and extends the life of assets.

Citadel keeps a full history of maintenance and costs: it allows you to make quick and informed decisions about replacing your assets.

Fill the lasting effects of optimized management.

Citadel optimizes all aspects of asset management and maintenance operations.

Creation and expansion of a database containing all types of assets, with ease.

Centralization and updating of all your asset data (intervention plan, PIIRL, GIS, Excel, and more)

Instant access to an asset's entire life cycle maintenance history, either in the office or in the field.

Improvement of the durability of your equipment and infrastructure.

A more efficient management of your teams and your maintenance operations (CMMS)

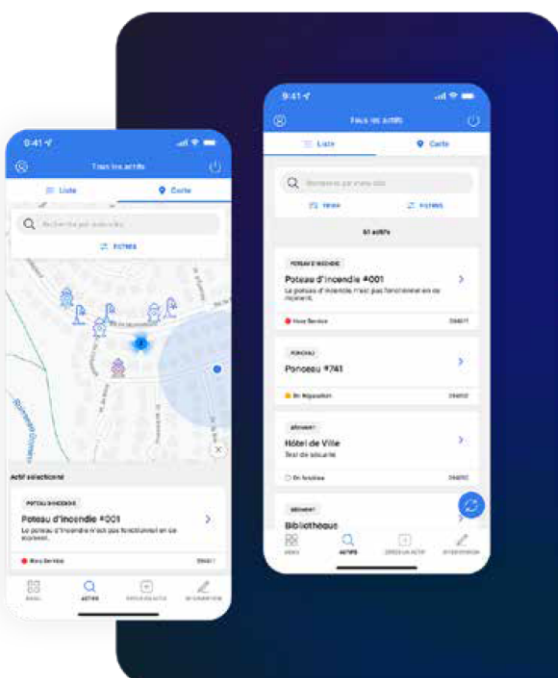

Decrease in problems related to employee turnover and loss of information.

Improved budget management and predictability of future investments.

Easier maintenance planning and decision-making.

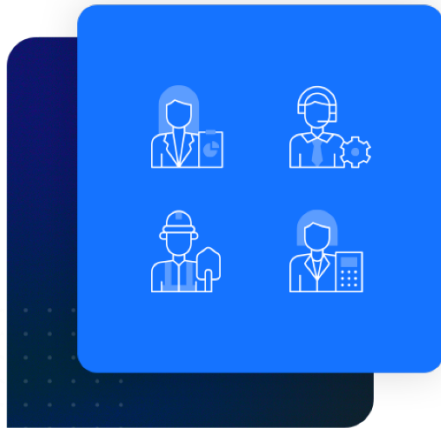

Improvement of the living environment and the quality of services offered to your citizens

Adoption of a sustainable development approach and ensuring a better future for generations to come

Get gains across all operations.

Asset management with Citadel brings agility and efficiency to all teams in the municipal organization. From operations to management, technical services, coordination and administration.

Operators

Have all the essential tools for your field operations right at your work site, no matter where it is located.

Coordinators

Be proactive in managing your teams with a 360° view of asset status and field operations.

Technical Services

Store and use the data you need to do your job efficiently, easily and independently.

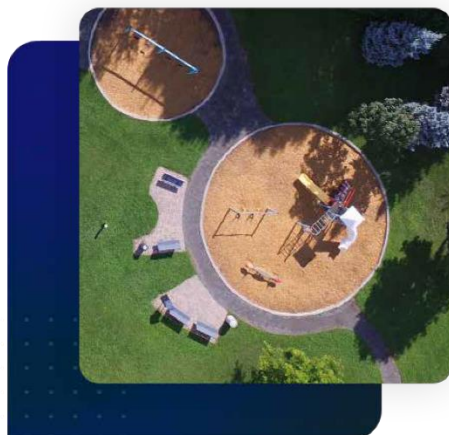

Management and Administration

Make the best possible decisions for the sustainability of your municipality and the quality of life of your citizens.

A 4-step methodology.

Citadel takes your organization through 4 stages of maturity to achieve the most efficient asset management.

Step A: Collect and Centralize your Data.

Citadel's preconfiguration and intuitive use allows you to easily create and manage your asset inventory.

Step B: Access your Data.

Citadel is cloud-based, which allows you to access all your asset information at a glance.

Step C: Plan your Maintenance Operations.

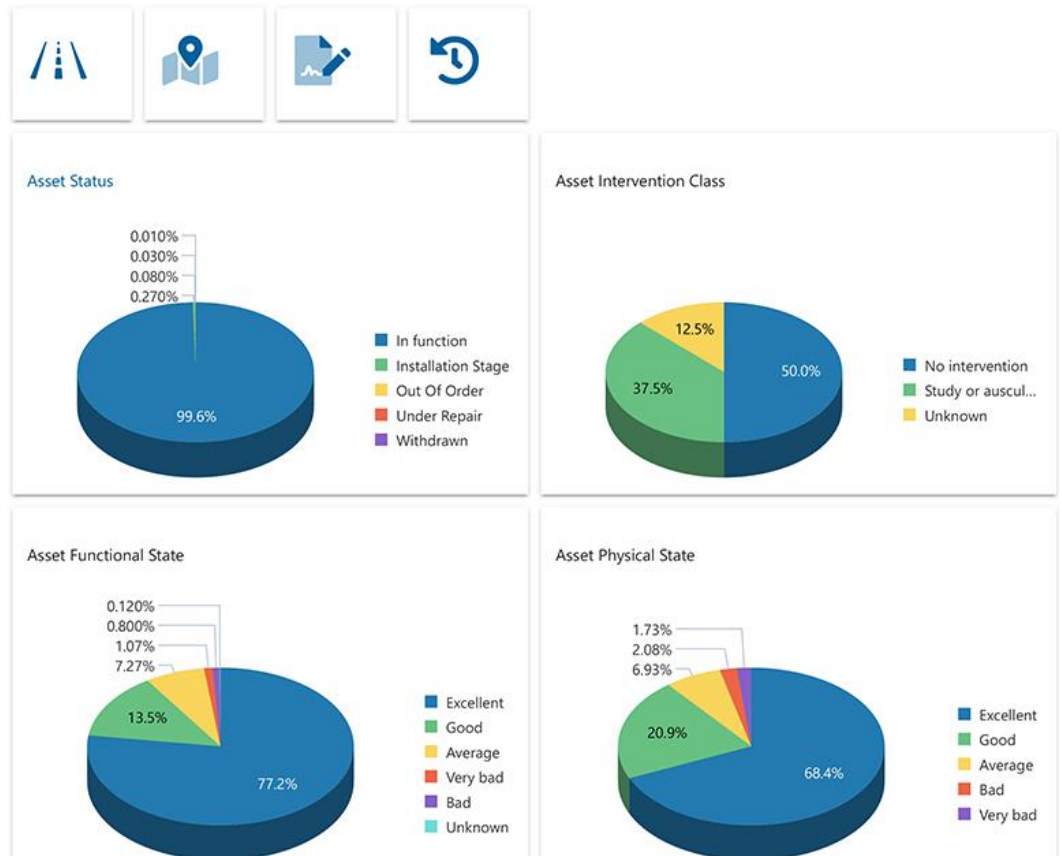

Citadel's user-friendly interface gives you a 360° view on all your assets, providing a more agile management.

Step D: Make Informed Decisions.

Citadel empowers you to make confident decisions based on reliable and synthesized data, leaving no guesswork.
