

BPMpolice Integrated BPM System for Police Investigation

Highly Secured and Protected Police Investigation

The Integrated BPM (Business Process Management) System for the Police Investigation **BPMpolice** is a sophisticated software, highly Safe and Secure, but very simple to use, dedicated to develop and manage effectively, the police investigation processes.

Control of Deadlines, Delays and Advances in the Investigation Processes

With the **BPMpolice** there is a centralized coordination of investigation deadlines, their delays and advances. The superiors can be informed in real time about these delays and advances of the ongoing investigation processes and may even intervene remotely, in real time.

Multi Agent, Multi Police Forces, Multi Cities, Multilanguage

Users may be located in different cities that the integrated software **BPMpolice** will always be available to be used by investigating agents from a single police force, or from distinct police forces. It simply depends on the police institutions and their users that are defined in the configuration of the **BPMpolice**. During the implementation phase, the Client can choose the Languages to be used in the system.

Tablets, Android Smartphones, iPhones, Netbooks, Notebooks, Desktop PCs, ...

With the **BPMpolice** you can access the investigation processes – in a highly secured way – from anywhere using your Tablet, or Android Smartphone, or iPhone, or Netbook, or Notebook, or Desktop PC and be informed in Real Time by SMS or Voice Mail through your mobile phone on the advances and delays of the processes under your responsibility, or when a new Activity (Task) requires your participation.

Police Investigation with No Duplications and with Rationalized Resources

The **BPMpolice** System prevents two or more police forces to investigate the same cases, avoiding unnecessary risk situations for Under Cover Agents or unnecessary duplications of human and material resources.

Better Control and Streamlining the Investigation Processes

The **BPMpolice** System allows a better management of the human and material resources involved in the investigation processes: for the immediate superiors of agents in the different police forces involved in the investigation processes, it can be assigned increasingly coordination accurate rights, to avoid risk situations for Under Cover Agents, or unnecessary duplication of human and material resources, as well as a better control of the ongoing investigation processes.

BPMpolice Integrated BPM System for Police Investigation

Secured Open Source Code: Java, BonitaSoft, ...

The **BPMpolice** System was exclusively developed by Europeans, following all the standards and regulations about privacy, confidentiality and safety established in Europe and by the International Law. It was used the safest, most sophisticated and latest Open Source Code development tools, precisely Java and BonitaSoft.

Integration with any existing Database

The **BPMpolice** System can be integrated with any database available on the market. So, all the processes data can be automatically transferred to other existing database systems of the client.

Implementation Methodology (~180 days) and payments

The **BPMpolice** System can be implemented in any City or Country and in any Language. The police users just need access to the Internet to access our cloud servers. If the police want a local installation, they just need a new Computer Server with one original operating system (Windows, Linux, Solaris, or any other that supports JAVA) with at least 16 GB of RAM and 1 TB (terabyte) of hard disk.

Phase:

1. Contract signature
2. Analysis, Configurations and Tests
3. Training: users and administrators
4. Implementation, Integration and Tests
5. Client Acceptance

TOTAL

Duration:

—
16 weeks
4 weeks
4 weeks
—
24 weeks

(The cost is based on an annual subscription fee, paid every twelve months)

Global Systems Architecture

Live Demonstrations and Clarifications

The **BPMpolice** System can be presented and demonstrated Live by Video Conferencing. We just need the Client to contact us to setup the day and time. For questions please contact: bpmpolice@inmental.com or Tel: +(351) 962 004 299.
